

nagual

A solo by Adriano Cangemi
10th season of international touring · 2027

CREATED FOR PUBLIC SPACE AND UNCONVENTIONAL VENUES

NAGUAL *moved by the wind*

Between circus and dance, NAGUAL invites us to travel together towards the highest clouds.

An aerial structure, two trapezes and a crystal sphere accompany a body moved by the wind, from stillness and contemplation to the joy of flight.

Without words, each transformation opens the way to the next, leaving the audience free to build their own adventure.

An encounter between the body, the space, the audience and the wind that moves everything.

30 min

Swinging trapeze

7 m rig with 6 anchor points

20 min

THE ARTIST

Adriano Cangemi

ARGENTINA / ITALY

Circus artist and choreographer

He began as a gymnast in Argentina and, after graduating in Communication, found his path in the circus. He trained in fixed and swinging trapeze at the Escuela de Circo Criollo de los Hermanos Videla in Buenos Aires, and toured the country with three traditional circuses, giving more than 400 performances.

In 2013 he came to Europe in search of a language of his own. He earned a Master's in Physical Theatre at the Accademia Teatro Dimitri (Switzerland), where he created NAGUAL, his first solo, awarded that same year at the Bewegter Wind festival (Germany).

For years he has trained intensively in dance, researching butoh with Atsushi Takenouchi and improvisation with David Zambrano. His work lives between circus, dance and physical theatre. He currently tours internationally with NAGUAL and works as a creator and teacher.

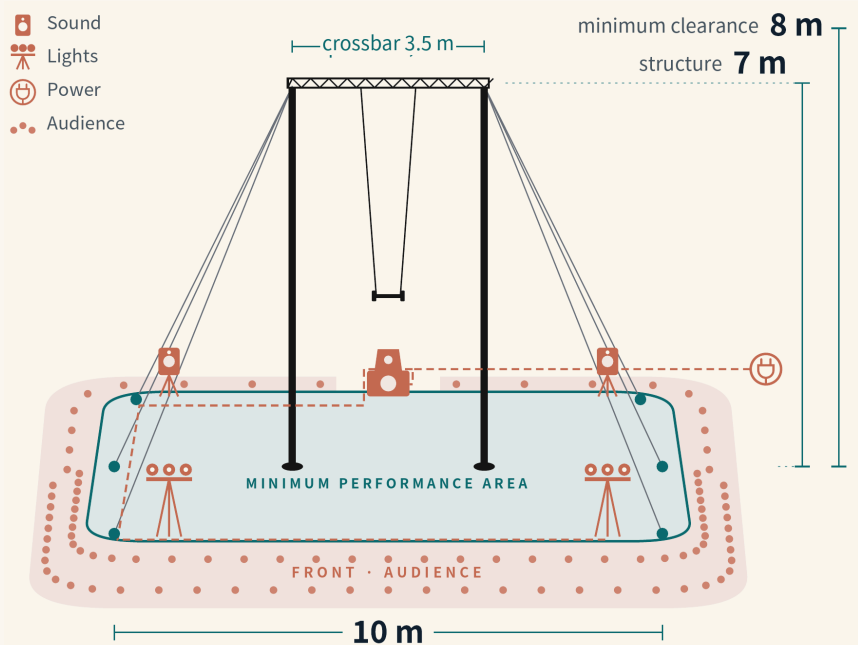

Swinging trapeze

TRUSS RIG · 6 ANCHOR POINTS · 7 M HIGH

30 min

SHOW DURATION

10 × 10 m

MINIMUM SPACE

8 m

CLEARANCE

12 m

FLIGHT PATH

120 / 90 min

SET-UP / STRIKE

Audience

Circular or semicircular, depending on attendance.

Ground

Flat and stable, or with a very slight slope.
Other surfaces: please ask in advance.

Anchoring

6 points. Options: ground stakes (provided); 6 weights of at least 500 kg; 6 IBC tanks of 1,000 L. Weights and tanks to be supplied by the organiser.

Flight path

6 m clear in front of and 6 m behind the structure, at crossbar height (watch for trees, cables, balconies).

Power

16 A, ideally 2 circuits. Own sound and lights.

Set-up

4 people from the organiser to raise the structure (15 min max.).

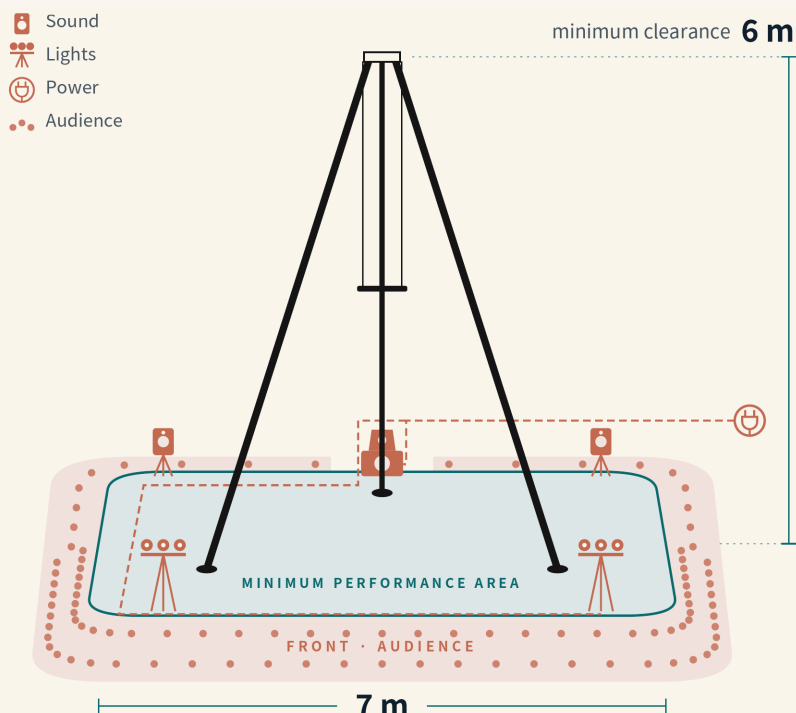

- Van access (6 m) to the set-up point.
- We perform in light rain if safety allows.

Fixed trapeze

FREESTANDING TRIPOD · NO ANCHORING · 6 M HIGH

20 min

SHOW DURATION

7 × 7 m

MINIMUM SPACE

6 m

CLEARANCE

0

ANCHOR POINTS

40 / 30 min

SET-UP / STRIKE
